

Procédure Backup end user

Créer un nouveau agent de backup , choisir le type serveur et le mode " Managed by backup server"

The screenshot shows the 'New Agent Backup Job' wizard at the 'Job Mode' step. The title bar says 'New Agent Backup Job'. Below the title bar is a Veeam logo and the text 'Job Mode Specify protected computer type and backup agent management mode.' On the left is a sidebar with a list of steps: Job Mode, Name, Computers, Backup Mode, Storage, Guest Processing, Schedule, and Summary. The 'Job Mode' step is selected. The main area has two sections: 'Type' and 'Mode'. Under 'Type', there are three radio buttons: 'Workstation', 'Server' (which is selected), and 'Failover cluster'. Under 'Mode', there are two radio buttons: 'Managed by backup server' (which is selected) and 'Managed by agent'. Below the 'Managed by backup server' option is a descriptive text: 'Veeam backup server schedules and executes backups on the protected computers. This mode is recommended for always-on workloads with a permanent connection to the backup server, such as servers or clusters located in the same data center.' Below the 'Managed by agent' option is another descriptive text: 'Veeam backup server deploys the protection policy to all agents, however the job is managed by the agent itself. This mode is recommended for workstations and servers located in remote sites with poor connectivity to the main data center.' At the bottom right are four buttons: '< Previous', 'Next >', 'Finish', and 'Cancel'.

Donner un nom et une description pour l'agent de backup et cliquer sur Next pour continuer

The screenshot shows the 'New Agent Backup Job' wizard at the 'Name' step. The title bar says 'New Agent Backup Job'. Below the title bar is a Veeam logo and the text 'Name Type in a name and description for this agent backup job.' On the left is a sidebar with a list of steps: Job Mode, Name, Computers, Backup Mode, Storage, Guest Processing, Schedule, and Summary. The 'Name' step is selected. The main area has two sections: 'Name' and 'Description'. The 'Name' section has a text box containing 'Job Backup Hedi W206002002'. The 'Description' section has a text box containing 'Created by SRV-VEEAM\Administrator at 08/24/2023 1:42 PM.' At the bottom left is a checkbox labeled 'High priority' with the text 'Backup infrastructure resources are offered to high priority jobs first. Use this option for jobs sensitive to the start time, or jobs with strict RPO requirements.' At the bottom right are four buttons: '< Previous', 'Next >', 'Finish', and 'Cancel'.

Sélectionner une machine individuel pour le backup job

[illegible]

Entrer le hostname
de la machine et les
informations
d'identification

The screenshot shows the "New Agent Backup Job" window, specifically the "Computers" step. On the left is a sidebar with navigation options: "Job Mode", "Name", "Computers" (highlighted), "Backup Mode", "Storage", "Guest Processing", "Schedule", and "Summary". The main area has a heading "Computers" with a green checkmark icon and explanatory text: "Select protection groups or individual machines to back up. Protection groups provide a dynamic selection scope that automatically updates the list of protected machines as new ones are discovered." Below this is a table titled "Protected computers:" with columns "Name" and "Type". To the right of the table are "Add..." and "Remove" buttons, and below those are "Up" and "Down" arrow buttons. An "Add Computer" dialog box is open in the center, containing fields for "Host name or IP address" (with the value "w206002002.qnb.bnk"), "Credentials" (showing "qnbho\ptn0607w" and a dropdown menu), and an "Add..." button. There is also a link for "Manage accounts". At the bottom of the dialog are "OK" and "Cancel" buttons. The bottom of the main window features "< Previous", "Next >", "Finish", and "Cancel" buttons.

Si le cas complète il faut choisir « Entire computer »

New Agent Backup Job

Backup Mode
Choose what data you want to back up from selected computers.

Guest Processing

Schedule

Summary

☐ **Entire computer**
Back up entire computer image for fast recovery on any level. Deleted, temporary and page files are automatically excluded from the image to reduce the backup size.
☐ Include external USB drives

☐ **Volume level backup**
Back up images of specified volumes, for example only data volumes. Deleted, temporary and page files are automatically excluded from the image to reduce the backup size.

☒ **File level backup (slower)**
Back up selected files and directories only. This mode still produces an image-based backup, but only with protected file system objects included in the image.
